PROFESSIONAL SUMMARY

Product Engineer with seven years of experience working remotely in Canada's creative and tech industry, designing and building web, mobile, and desktop products used by millions of people, including 10 products across GoThru's 360° virtual tour and Google Street View platform. Experienced across the full process, from user research and wireframes in Figma to frontend code in React, TypeScript, and Tailwind CSS. Holds a 5/5 client satisfaction rating across hundreds of cross-platform projects and a 95–100% on-time delivery record. Uses AI coding tools such as Claude Code, Codex, OpenCode, Cursor, and Antigravity to prototype and ship faster.

WORK EXPERIENCE

Product Engineer – UI/UX & Frontend

GoThru | Canada (Remote) | November 2019 – Present

- Design and build user interfaces for **10 products** in GoThru's 360° virtual tour and Google Street View platform: Panorra, TourMkr, GoThru Dashboard, StreetBuilder, GoThru Navigator, Villume, MapThru, GoThru PhotoStudio, GoThru 360 Virtual Tour Maker, and GoThru Marketing.
- Led a product redesign end to end that reached **#1 in user engagement within 24 hours** of launch, well ahead of the previous version.
- Built design systems that live in both Figma and code, making design-to-dev handoff **70% faster** and keeping the product consistent across the ecosystem.
- Maintain a **5/5 client satisfaction rating** across hundreds of cross-platform projects, with many clients staying on for long-term partnerships.
- Deliver **95–100% of projects on time** while working remotely with clients in different time zones.
- Handle each project from user research and wireframes through user flows, high-fidelity UI, interactive prototypes, and developer handoff in Figma.
- Turn loosely defined business requirements into clear user journeys and responsive layouts, and build them in HTML, CSS, and JavaScript so the shipped product matches the approved design.
- Deliver across desktop applications and social media platforms with consistent brand messaging and strong visuals.
- Use Claude Code, Codex, OpenCode, Cursor, Antigravity, and Google Stitch to speed up prototyping, UI generation, and design-to-code work.

SKILLS

Product & UX: UI/UX Design, User Research, Wireframing, User Flows, High-Fidelity Design, Interactive Prototyping, Design Systems, Responsive Web & Mobile Design, UX Writing

Web Development: HTML5, CSS3, JavaScript, TypeScript, React, Svelte, Tailwind CSS, shadcn/ui, TanStack Start, Node.js, Git, GitHub, Responsive Web Design, Design Handoff

Design Tools: Figma, Google Stitch, Framer, Adobe Photoshop, Adobe Illustrator, Affinity

AI Tools & Coding Agents: Claude Code, OpenAI Codex, OpenCode, Cursor, Antigravity, Claude, ChatGPT, Gemini, Prompt Engineering, AI-Assisted Coding and Prototyping, Workflow Automation

Languages: English (Fluent), Indonesian (Native)

EDUCATION

Bachelor of Information Systems

Universitas Subang | Graduated 2025 | GPA 3.65 / 4.00

CERTIFICATIONS

- **UI/UX Design** – Build With Angga (BWA)
- **HTML, CSS, JavaScript, and Node.js** – Udemy
